PERSONAL INFORMATION

Software developer with experience building web applications, REST APIs, and cloud-based solutions. Skilled in JavaScript, Java, SQL, and modern web technologies, with hands-on experience developing backend services and integrating scalable APIs with frontend applications.

Experienced working with AWS services including Lambda, Amazon RDS, and EC2 within secure VPC environments, using SSH tunneling and database optimization techniques to support high-volume data systems.

Currently working in a hybrid technical role that combines software development and enterprise IT support, which has strengthened my ability to troubleshoot complex systems, understand production environments, and deliver reliable technical solutions.

Passionate about backend development, system architecture, and continuous learning, currently pursuing a degree in Software Engineering while building real-world projects focused on scalable software systems.
